EDUCATION

MS Data Science, Analytics and Engineering

Arizona State University, Tempe, AZ

Aug '24 - May '26

3.74/4.0 GPA

B.Tech Computer Science & Engineering

Bennett University, India

Oct '20 - Jun '24

9.29/10.00 GPA

SKILLS

Programming: Python, C++, SQL, Java, CUDA, Hive Query Language (HQL), Linux, Bash, Julia, Pig Latin

Frameworks/Libraries: PyTorch, Transformers, TensorFlow, Keras, LangChain, SpaCy, Scikit-Learn, NLTK

ML Workflow & Deployment: Feature Engineering, Model Evaluation, GraphRAG, A/B Testing, Knowledge Graphs, CI/CD

Tools: Docker, Git, AWS (SageMaker, EC2), Neo4j, Apache Spark, PostgreSQL, Kubernetes, Snowflake, Tableau, Runpod

EXPERIENCE

AI Enablement Manager

Feb'26 - Present

Chugh LLP, Cerritos, CA

- Lead AI enablement by implementing AI solutions, automating workflows, and build AI infrastructure for legal processings.

Data Analyst [AI Team]

Dec '24 - Present

ASU Decision Theater Network, Tempe, AZ

- Deployed **LLM-based Retrieval-Augmented Generation (RAG)** pipelines over **400k+** publications using embedding models, vector databases, and semantic search to enable context-aware retrieval for public sector and healthcare use-cases.
- Improved LLM outputs by **25%** through advanced retrieval optimization including hybrid search, ranking models, and prompt engineering, combined with domain-specific evaluation metrics to reduce hallucinations and strengthen contextual grounding
- Built scalable pipelines for automated document ingestion, full-text parsing, and metadata normalization using **Gemini, LLaMA, GROBID**, and **APIs** (Scopus, PubMed, OpenAlex), processing large-scale databases for analytical workloads.

AI/ML Research Intern

Aug '23 - Jul '24

Georgia Institute of Technology, Atlanta, GA

- Applied **GAN-based methods** to enhance privacy in LLMs, achieving a **4–8%** drop in data leakage while maintaining high task accuracy. Executed scalable training and evaluation using **Hugging Face, GPUs, and Runpod**. **[Published: Sept' 24]**
- Performed a **privacy analysis of LLMs**, executing **six advanced black-box attacks** to identify vulnerabilities in sensitive data exposure and personally identifiable information, contributing to secure AI systems. **[Published: May '24]**
- Introduced two novel chaining techniques utilizing **smaller language models** and **ensemble methods**, reducing computational costs by **55%** and improving financial reasoning and arithmetic **accuracy by 5-10%**. **[Published: Jan'24]**

Data Analyst – Trainee

Jan '24 - Apr '24

BizInsights Inc., Remote

- Contributed to a **life sciences data quality** project for a Fortune 500 pharmaceutical company, using **Snowflake, SQL**, and **Python** to analyze datasets and improve data integrity across **3 warehouses** with millions of rows.
- Optimized production data pipelines using **statistical analysis** and **feature validation** techniques, reducing system latency by **60%**, improving data quality used by downstream analytical and machine learning models for **8 teams** and **50,000+ users**.

PROJECTS

MindSync AI - Agentic Planner with Cognitive Load Balancing

Fall '25

Created an **agentic AI personal planner** using **LangChain's LangGraph** and FastAPI integration, orchestrating parser, classifier, scheduler, and summarizer agents to parse complex tasks, infer detailed user cognitive and energy profiles, and generate optimized daily schedules with LLM-guided cognitive load balancing and AI-driven productivity optimization.

CodeSense - RAG powered code assistant

Spring '25

Implemented a **Retrieval-Augmented Generation (RAG)** pipeline for code intelligence, indexing **100k+ Python code snippets** and combining **FAISS** vector embeddings with **BM25** retrieval for accurate semantic search. Integrated **Reciprocal Rank Fusion** and the **Qwen** large language model (LLM) for context-aware Python code generation, aligning with developer intent.

BELL

Launched a **women's health and mental well-being platform** built using **OpenAI's ChatGPT** and the **LangChain** framework. It has attracted over **1,400+ views** and **1,000+ unique active users**. Link to the app: <https://www.hereforyou.app/>

LEADERSHIP AND OUTREACH

President: The AI Society at ASU, Tempe, AZ

May '25 – Jan'26

Scaled the community to **1800+ members** and delivered **15+ bootcamps** and workshops on machine learning and AI techniques.
